

Certificate Supplement

Description of the vocational education and training programme for
Auto electrician

Title of certificate in Danish

Uddannelsesbevis for **Autoelektromekaniker**

Translated title of the certificate

Auto electrician

Profile of skills and competences

A trained auto electrician is able to:

- organise and complete rational work processes in connection with the servicing of and error detection in petrol- and diesel-powered vehicles, including repair or replacement of worn defective parts;
- assess the possibilities of repair and advise on the most economical repair based on customer requirements and expectations as regards cost, road safety, the appearance and utility value of the vehicle and environmental requirements;
- carry out work using repair manuals in Danish and other languages as well as other available data, including public authority requirements concerning motor vehicles, using the minimum equipment required in the trade;
- carry out work in accordance with road traffic legislation, safety regulations and environmental requirements in accordance with instructions and applicable safety regulations.

A trained auto electrician has experience in:

- Motor vehicle maintenance, servicing, error detection and correction
 - Using the tools of the trade as well as testing and measuring equipment
 - Planning work processes
 - Using technical documentation as well as user documentation and instructions.
-

Range of occupations accessible to the holder of the certificate

Trained auto electricians mainly work at specialist auto electronic garages, but may also be employed at conventional car repair shops. In addition, central government, the armed forces and some local authorities operate their own repair shops.

Certificate Supplement

Description of the vocational education and training programme for

Auto electrician

Duration and mode of education and training

The total duration of the education and training programme is 4 years, with 50 weeks of formal education and training and 158 weeks of on-the-job training.

Danish vocational education and training programmes are alternating programmes, which means that the education and training activities alternate between education and training at a school and on-the-job training in an enterprise.

Level of certificate

The training programme is a full vocational education and training programme, equivalent to level 3 in the Isced system (Isced 1997).

Access to the next level of education/training

The education and training described in this certificate gives access to level 4 (Isced) education and training in Denmark.

Name and status of the body awarding the certificate

Metalindustriens Uddannelsesudvalg
Vesterbrogade 6 D, 4. Sal
1780 København V

In pursuance of an order issued by the Danish Ministry of Education, the awarding authority is authorised to issue a certificate concerning this education and training program.

Grading scale

7-point grading scale

On certificates issued after 1 August 2007, the 7-point grading scale is used.

On certificates issued before 1 August 2007, the 13-point grading scale is used.

The 13-point grading scale was replaced by the 7-point scale as per that date.
