

Certificate Supplement

Description of the vocational education and training programme for
Operation of telescopic loader with fork – A Certificate

Title of certificate in Danish

Uddannelsesbevis for **Teleskoplæsser med gafler – betjening Certifikat A**

Translated title of the certificate

Operation of telescopic loader with fork – A Certificate

Profile of skills and competences

The certificate holder is able to:

- operate telescopic loaders with forks to perform lifts and move various types of goods in accordance with the regulations issued by the Danish Working Environment Authority;
 - operate various other versions of both loaders and attachments;
 - assess the manoeuvrability of the loader (by means of its control system), its centre of gravity and stability, using the loader's load chart;
 - perform various jobs on the basis of his or her knowledge of how the stability of the loader changes in connection with lifts, when the jib boom is used and during swings;
 - lift, set down and stack various types of goods on the basis of his or her knowledge of the goods;
 - operate the telescopic loader safely and with due consideration of the physical surroundings and people close to the loader, and operate it on uneven surfaces and in narrow passages;
 - carry out daily checks and general maintenance of the loader and make sure that statutory overhauls of both the loader and its attachments are carried out as required.
-

Range of occupations accessible to the holder of the certificate

Typiske jobs eller arbejdsområder

Certificate holders typically work in the transport sector or the construction industry where they operate telescopic loaders with forks, lifting and moving different types of goods, picking up and setting down loads and performing stacking operations.

Certificate holders use telescopic loaders safely with due consideration of the physical surroundings, people close to the loader, surfaces and narrow passages, and they carry out daily checks and maintenance of loaders and their attachments.

Certificate Supplement

Description of the vocational education and training programme for

Operation of telescopic loader with fork – A Certificate

Duration and mode of education and training

The total duration of the education programme is 5 days

The education programme has taken place at a VET-institution which according to the resolutions of the legislation is approved by the Ministry of Education to offer and implement the education programme.

Level of certificate

The training programme is a full vocational education and training programme, equivalent to level 3 in the Isced system (Isced 1997).

Access to the next level of education/training

The education and training described in this certificate gives access to continuing and further vocational education and training in Denmark.

Name and status of the body awarding the certificate

The certificate of the education programme is issued by the VET-institution according to the regulations on the education programme laid down by law.

In pursuance of an order issued by the Danish Ministry of Education, the awarding authority is authorised to issue a certificate concerning this education and training program.

Grading scale

A "passed" scale is used on the certificate issued by the institution of training and education
